KEY	Temperature range	°C	-20 to 50
SPECIFICATIONS	Pressure range	kPa	80 to 120
	Humidity range	% rh continuous	20 to 90
	Storage period	months @ 0 to 20°C (stored in original container)	6
	Load resistor	$\Omega$ (recommended)	10 to 33
	Bias voltage	mV above analogue ground	not required
	Weight	0	< 13

At the end of the product's life, do not dispose of any electronic sensor, component or instrument in the domestic waste, but contact the instrument manufacturer, Alphasense or its distributor for disposal instructions.

# **PH3-BE Performance Data**

## **Figure 2 Zero Temperature Dependence**

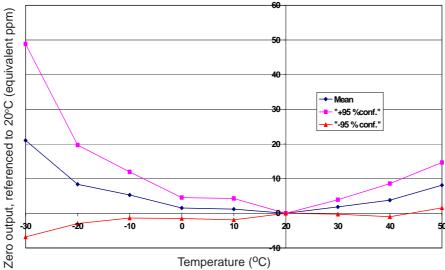

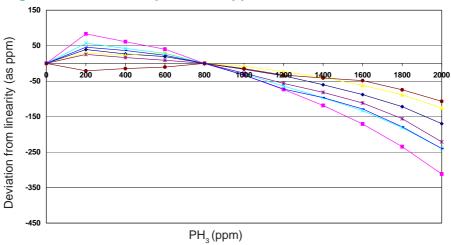

Figure 2 shows the variation in zero output caused by changes in temperature, expressed as ppm gas equivalent, referenced to zero at 20°C.

This data is taken from a typical batch of sensors. The mean and ± 95% confidence intervals are shown.

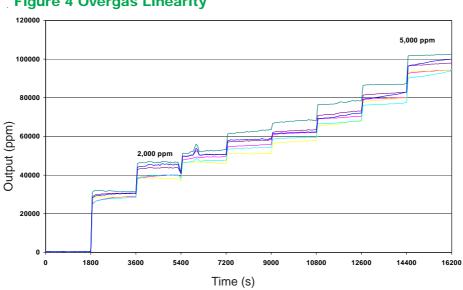

Figure 3 Deviation up to 2,000 ppm

Sensor linearity is repeatable between sensors, allowing for correction software required.

Data is from a typical batch of sensors.

#### **Figure 4 Overgas Linearity**

Sensors respond rapidly and are stable even at 5,000 ppm PH<sub>3</sub>.

Sensors recover after short high concentration exposure without change performance.
